“Artificial Intelligence is not a replacement,
it is a Tool.

Allow me to teach you how to use it.”

– Juan Jaramillo

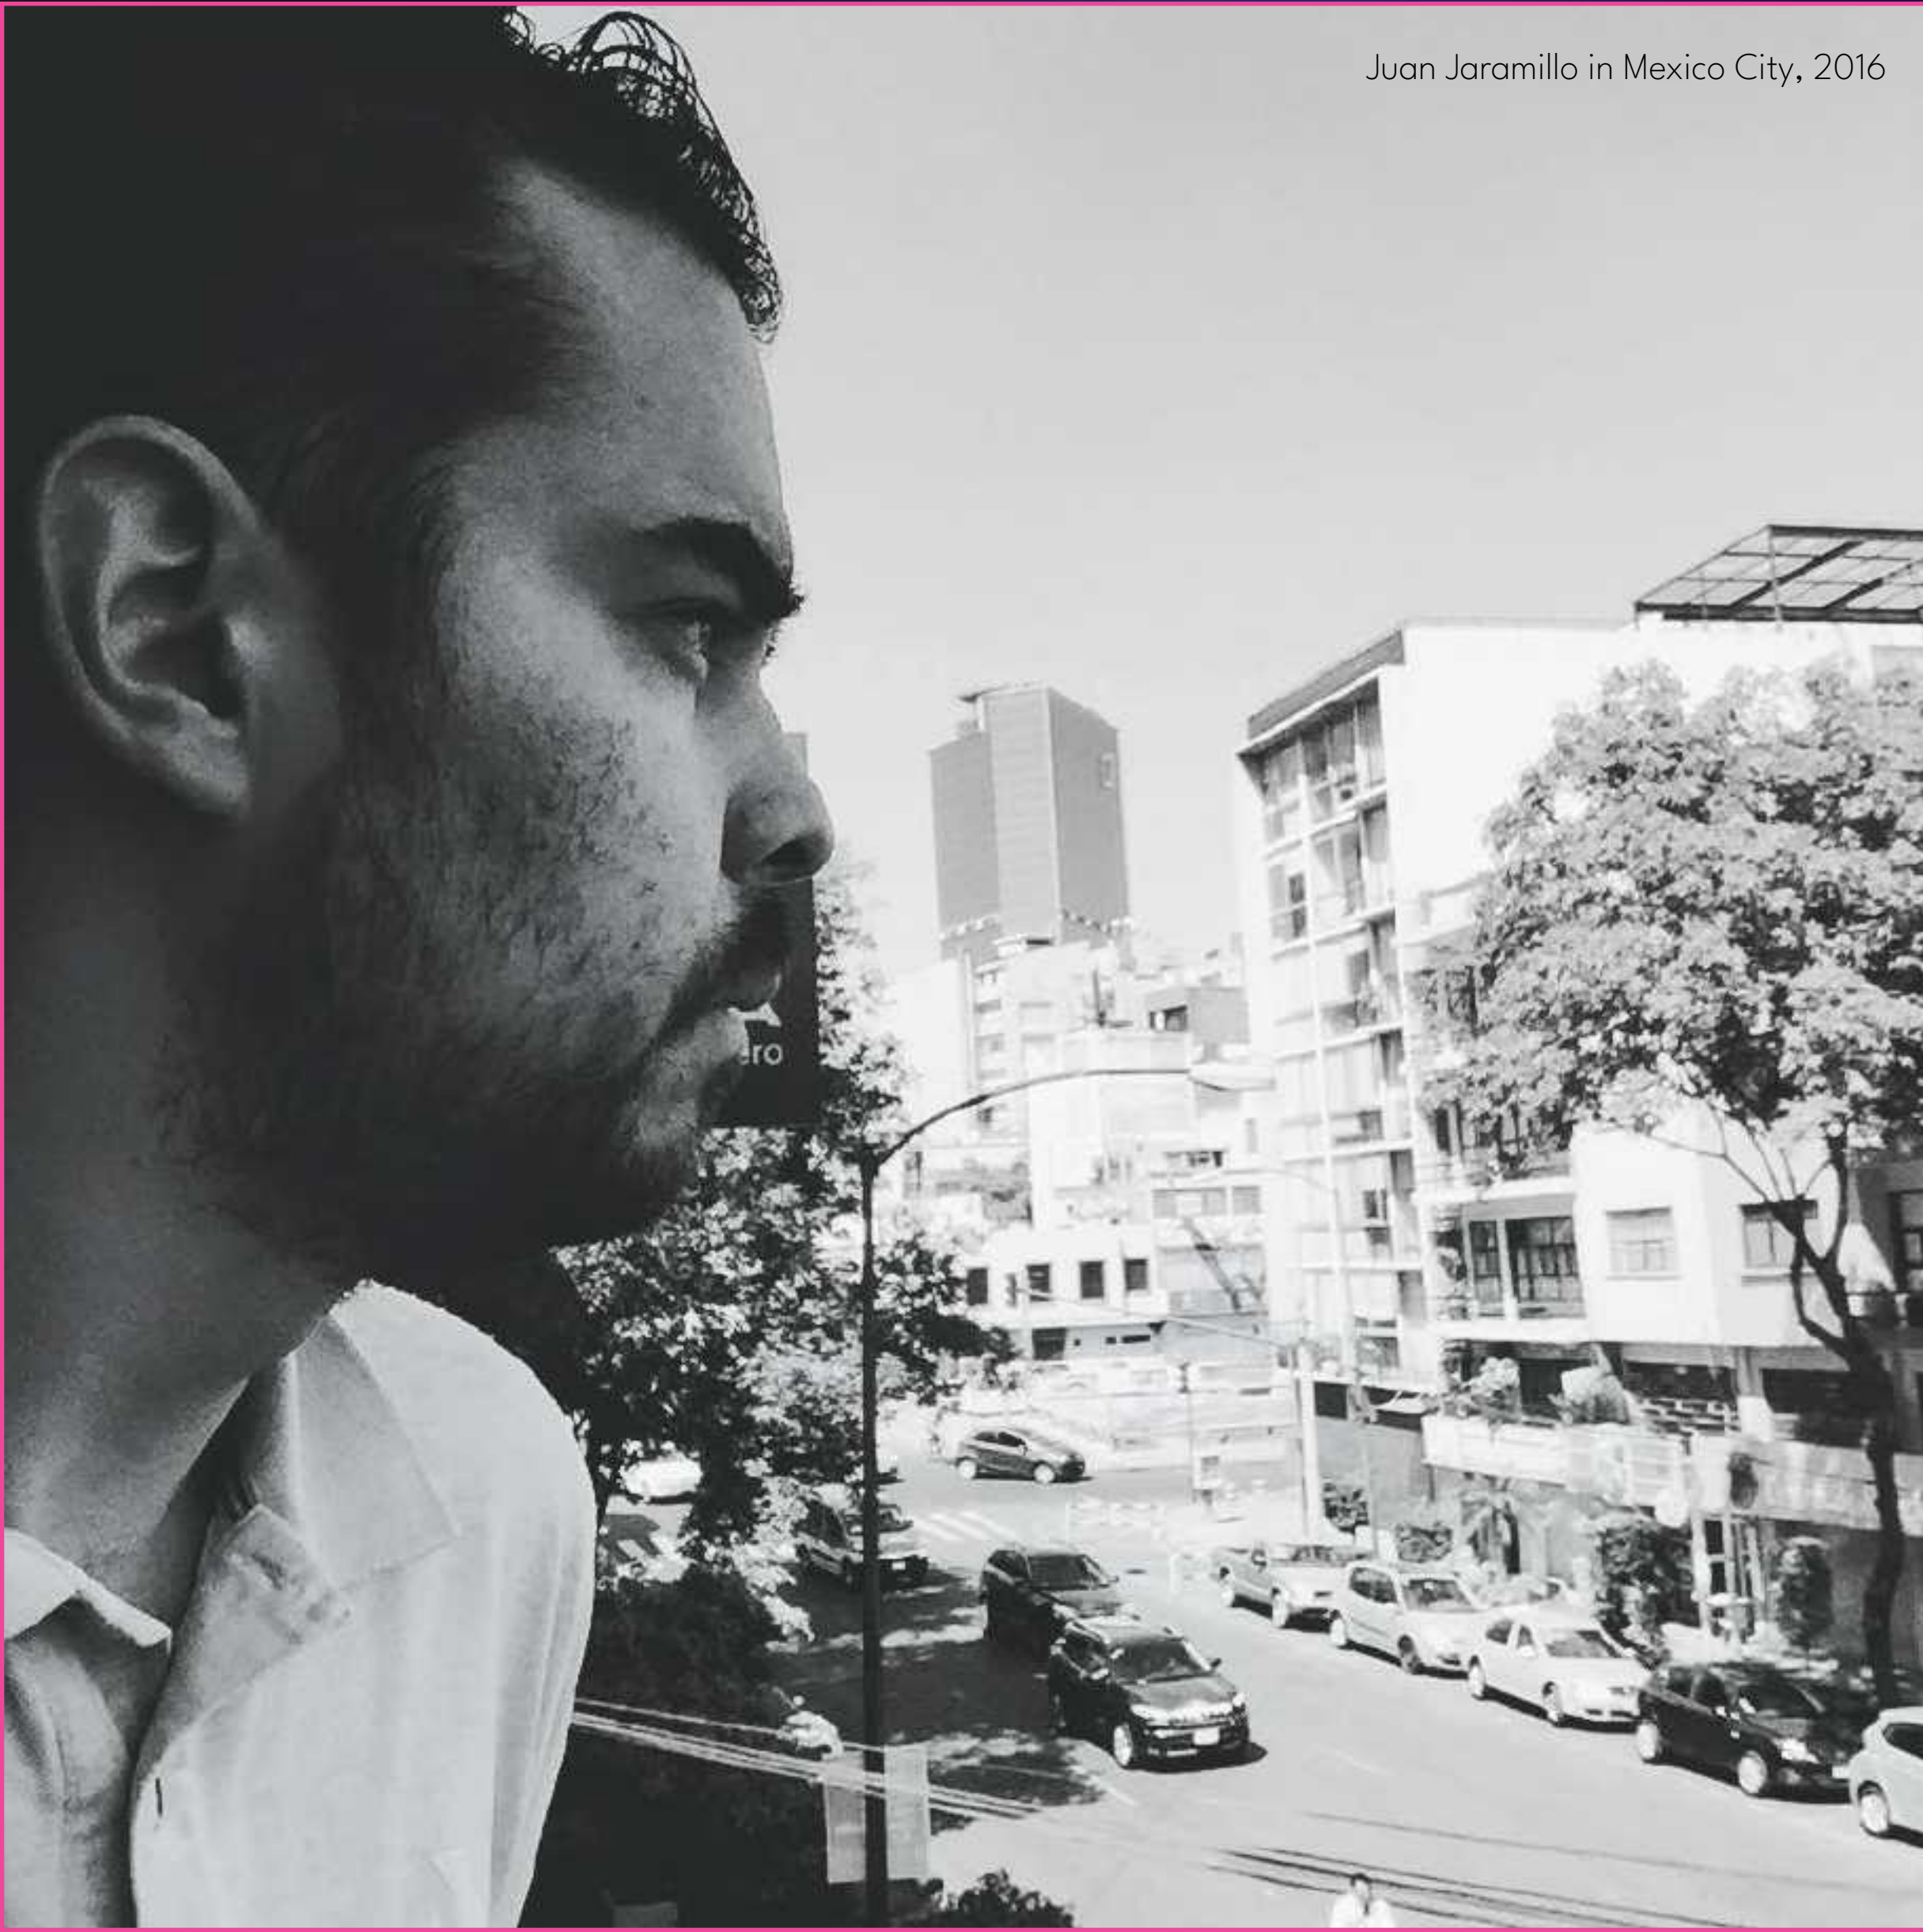

Since 2007, **Obsessed** with Technology and AI

I'm Juan Jaramillo. A Prompt Engineer, Consultant and Generative AI Specialist from Bogota, Colombia.

After having been an entrepreneur, CEO, CTO and co-founder of technology startups for more than 17 years, I decided to make my knowledge available to people and companies to automate and optimize their operations by leveraging Artificial Intelligence.

Juan Jaramillo in Mexico City, 2016

My story in the world of technology and digital began as soon as I graduated from Central University in 2007, the year in which I started to undertake digital projects.

This was the time when the big technology companies in Silicon Valley began to consolidate as global giants.

In 2009, I co-founded and was the project director of LaQuintaP, a digital marketing agency where we worked with Key Accounts such as G4S and Coca-Cola FEMSA, among others.

In May 2014 I founded FreshWorks Digital Agency, an Internet marketing and social media agency for medium and large companies, with presence in Colombia, Mexico and Spain.

With this agency, we collaborate with companies such as Grupo Herdez, Grupo ALSEA and El Corte Inglés.

Living among this ecosystem was what led me to become interested in digital startups and their highly scalable business models.

In 2020, I co-founded and was the CTO of TRADEBOG, a Colombian startup that created ZIONE Shop which is currently the best Dropshipping application in Colombia.

Since 2022 I have specialized in Generative Artificial Intelligence offering Generative AI consulting and implementation services for startup founders, entrepreneurs and companies of any size.

In the course of this period, I have been able to advise on Generative AI to several organizations. Among them are the Telefónica Movistar Foundation, the Francisco Marroquín University of Guatemala and the Wundermann Miami Advertising Agency.

I have also collaborated with ZiONE Shop, a leading Social Shopping platform. My main contribution has been to optimize their operations using Artificial Intelligence.

Advantages of Generative AI-powered tools

66%

Monthly Cost Reduction

The material obtained is
Copyright Free

46%

Increased Productivity

Content generation with
Verifiable and Citable Sources

Automation
of repetitive tasks
