

Juan Miguel Jaramillo Gaviria

AI Engineering Lead | LLM & Generative AI Architect

Bogotá, Colombia | info@juanjaramillo.tech | +57 305 420 6139 | juanjaramillo.tech | [LinkedIn](#)

Professional Summary

Enterprise AI Engineering Lead and Generative AI Architect with over 17 years of technical execution and entrepreneurial leadership. Specialist in designing, training, and scaling enterprise-grade generative AI systems, orchestrating multi-agent frameworks, and building production-grade RAG pipelines. Hands-on expert in LLM fine-tuning (PEFT, RLHF), robust prompt engineering, prompt versioning via Git Flow, and hallucination risk mitigation. Highly proficient across Next.js 15/16, React 19, TypeScript, Python, and cloud-native architectures on Google Cloud Platform, delivering high-performance AI products that solve complex business objectives and significantly reduce infrastructure overhead.

Core Proficiencies & Technical Expertise

AI Engineering & Tuning: LLM Fine-Tuning (PEFT, LoRA, RLHF), Advanced Prompt Engineering, Hallucination Risk Mitigation, Prompt Versioning (Git Flow), Vector Databases (Chroma, PGVector), RAG Architectures.

AI Frameworks & Models: LangChain, LangGraph, CrewAI, Vertex AI Agent-to-Agent (A2A), Gemini 2.5 Flash, n8n Workflow Automation, OpenAI GPT, Hugging Face, Cursor AI IDE.

Full-Stack Software Engineering: Python (Advanced), TypeScript, JavaScript, ReactJS/React 19, Next.js 15/16, Astro 5, Node.js, SQL, PostgreSQL, Supabase, PHP (Legacy WordPress Architecture).

Cloud Infrastructure & DevOps: Google Cloud Platform (Cloud Run, Cloud Armor, BigQuery, Compute Engine), Supabase, Docker, Vercel, PM2, Git, GitHub Actions.

Professional Experience

AI Development Lead - TopNetworks Inc.

Feb 2025 – Jun 2026 | Remote / Bogotá, Colombia

Key Focus: Model Tuning (PEFT, RLHF), Vertex AI, Gemini 2.5, LangChain, Multi-Agent Orchestration, Git Flow Prompt Versioning

- Spearheaded generative AI engineering strategy and full-stack machine learning architecture for high-performance publishing platforms serving the US, UK, Mexico, and Latin America.
- Designed, built, and launched a core proprietary internal SaaS ecosystem leveraging state-of-the-art LLMs and multi-agent frameworks:
- EmailGenius:** High-throughput AI email generation engine engineered with Vertex AI, Gemini 2.5 Flash, and PostgreSQL; implemented LLM fine-tuning and rigorous validation pipelines to ensure high personalization.
- RouteGenius:** High-concurrency probabilistic web traffic routing engine built on Supabase, running concurrent multi-agent AI workflows in n8n via webhooks to dynamically automate traffic routing based on real-time revenue signals.
- TrafficGenius:** Real-time invalid traffic detection and security intelligence platform utilizing BigQuery ML models and Cloud Armor to isolate fraudulent traffic patterns.
- Social Media Genius:** AI-native social content generator featuring an interactive canvas editor driven by generative image and text models.
- Managed LLM prompt versioning using Git Flow, structured hallucination risk frameworks, implemented evaluation datasets, and deployed production-grade services on GCP.

Prompt Engineer & AI Consultant - Juan Jaramillo (Independent Practice)

Nov 2022 – Present | Remote & On-Site

Key Focus: Generative AI Architecture, Prompt Optimization, Custom Agentic Systems, Enterprise LLM Integrations

- Deliver specialized technical consulting on generative AI architecture, prompt engineering optimization, and custom LLM integrations for enterprise and mid-market clients, including the **Telefónica Movistar Foundation**, **Universidad Francisco Marroquín**, and **Wundermann Thompson Miami**.
- Architected and implemented multi-agent workflows using LangChain, LangGraph, and CrewAI, establishing robust agent-to-agent (A2A) communications that drastically reduced manual operational steps.
- Achieved documented client outcomes including up to a **46% increase in team productivity** and a **66% reduction in monthly infrastructure** and cloud operational overhead through optimized LLM utilization and precise prompt structures.

- Co-founder & Director of Innovation - TRADEBOG S.A.S.**
 - Directed full-stack development and technical product roadmap for Colombia's leading dropshipping and e-commerce platform.
 - Optimized complex transactional backend workflows and integrated programmatic data-driven pipelines to support high-concurrency purchase funnels.

Dec 2020 – Jun 2023 | Bogotá, Colombia (On-Site)
- Co-founder & Operations Director - FreshWorks | Ideas Frescas**
 - Managed technical delivery, web architectures, and custom database integrations for enterprise clients including **Grupo Herdez** and **El Corte Inglés**.
 - Led cross-functional international teams in delivering digital products, custom CMS architectures, and enterprise UI/UX engineering projects.

May 2014 – Jun 2023 | Mexico, Colombia, Spain

Education & Certifications

- Generative AI for Business: Driving Growth and Competitive Advantage**
University of Toronto

Focus: AI strategy, innovation, ethics, decision-making, governance, and organizational transformation.

Dec 2022 – Feb 2023
Certified Diploma (Remote)
- Prompt Engineer with Emphasis on ChatGPT**
Platzi

Focus: Advanced prompt structures, extension and plugin integrations, LLM constraints, and hallucination reduction.

Feb 2023 – Apr 2023
Certified Course (Remote)
- Social Network Analysis: Digital Communication & Contents**
University of Michigan

Skills: Algorithmic Communication, Data analysis, and social network strategies.

Sep 2013 – Dec 2013
Certified Course (Remote)
- Bachelor's Degree in Advertising and Marketing**
Universidad Central

Focus: Creative direction, strategic messaging, and art direction.

Feb 2002 – Nov 2007
Professional Degree (On-Site)

Languages & Interests

Languages: Spanish (Native) | English (Full Professional & Technical Proficiency)
Interests: Generative AI Research, Multi-Agent Systems, Machine Learning Ethics, Blogging, Technical Mentoring.
