Juan Miguel Jaramillo Gaviria

Forward Deployed Engineer (FDE) | Generative & Agentic AI Engineer | AI/LLM & Full-Stack Architect

Bogotá, Colombia

I am an AI Development Lead and full-stack engineer focused on building production-grade Generative AI and agentic systems that deliver measurable business outcomes. I combine product strategy, solution architecture, and hands-on implementation to take AI initiatives from discovery through deployment across U.S. and Latin American markets.

I have experience building LLM applications, workflow automations, and enterprise integrations using Python, TypeScript/JavaScript, LangGraph, CrewAI, MCP, and modern model ecosystems, including OpenAI, Anthropic, Google, and open-source technologies. I also have strong experience delivering cloud-native solutions.

As AI Development Lead at TopNetworks Inc., I led AI strategy, solution architecture, and full-stack implementation for an enterprise GenAI SaaS ecosystem serving the U.S., U.K., Mexico, and Latin America. I am targeting roles such as Forward Deployed Engineer, Applied AI Engineer, GenAI Engineer, LLM Engineer, Agentic AI Engineer, and AI Solutions Architect.

FOCUS AREAS

- **Forward Deployed AI Engineering:** Business problem discovery, rapid prototyping, production rollout
- **Generative AI Product Development:** RAG, copilots, assistants, AI SaaS features
- **Agentic AI Systems:** Multi-agent orchestration, tool calling, planner/executor patterns, durable workflows
- **LLMOps and AI Reliability:** Evaluation frameworks, regression testing, observability, safety guardrails
- **AI Solution Architecture:** API and data design, integration strategy, scalability and cost optimization
- **Full-Stack AI Delivery:** Python, TypeScript/Node.js, React/Next.js, cloud deployment and operations

AI ENGINEERING & INTEGRATION SKILLS AND TOOLS

- RAG architectures
- Vector databases (Chroma, PGVector)
- MCP servers/tools & custom integrations
- LLM evaluation suites
- Docker/containers
- CI/CD (GitHub Actions)
- Systems integration (REST, Webhooks)
- LLM Skills

WORK EXPERIENCE

AI Development Lead

TopNetworks Inc. · Independent
feb. 2025 - jun. 2026 · 1 year 4 months
Bogotá D.C. Metropolitan Area · Remote
Prompt Engineering Techniques & Best Practices, Hallucination Risk Management, GenAI and Prompt Versioning Techniques using Git Flow.

- I lead AI strategy, architecture, and full-stack development for TopNetworks' performance publishing platforms, serving the U.S., U.K., Mexico, and Latin America.
- I designed and built the internal SaaS ecosystem: EmailGenius (AI email generation with Vertex AI + PostgreSQL), TrafficGenius (invalid traffic detection and security analytics with BigQuery + Cloud Armor), RouteGenius (probabilistic traffic distribution with Supabase), and Social Media Genius (social content generation with an AI canvas editor).
- Delivered systems directly against live production traffic and partner/stakeholder integrations — owning discovery-to-production rollout, evaluation suites for non-deterministic LLM behavior, and production reliability rather than demos.
- **Stack:** Next.js 16 (App Router), TypeScript, React 19.2, Astro 6, Tailwind CSS v4, Vertex AI (Gemini 3), PostgreSQL 18, Google BigQuery, GCP (Cloud Run, Cloud Armor, Compute Engine, Cloud DNS), PM2, Docker, Vercel.

Prompt Engineer and AI Consultant

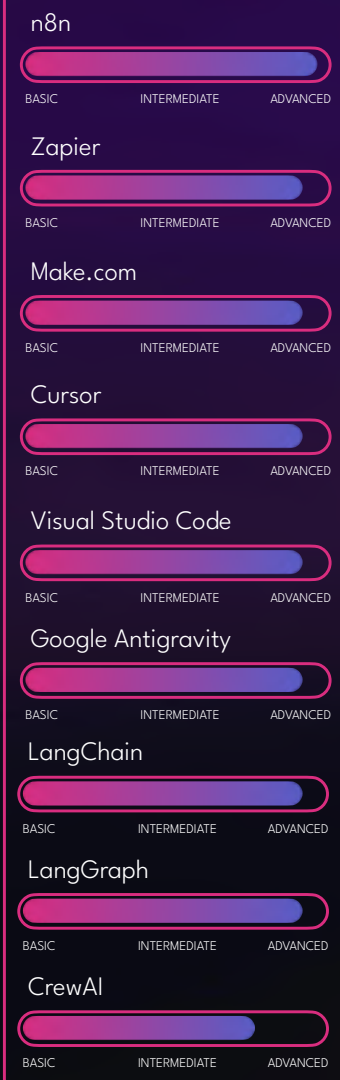

Juan Jaramillo · Independent
nov. 2022 - present · 4 years
Bogotá D.C. Metropolitan Area · Remote / On-Site
Prompt Engineering Techniques & Best Practices, LLM Fundamentals & Hallucination Risk Management, GenAI and Prompt Versioning Techniques using Git Flow.

- Prompt Engineer, expert AI consultant
- UX/UI designer and Front-end and back-end developer for AI projects

Co-founder / Director of Innovation

TRADEBOG S.A.S. · Full-time
dec 2020 - jun. 2023 · 2 years 7 months
